CLLR-K03 - Lan-Key Moulded RPET Keyring (UK Stock)

A unique UK made keyring made from recycled exhibition lanyards.

This special keyring completes the **closed loop recycling** process which has revolutionised the whole approach to the supply of lanyards, especially for large single use events.

The keyring has been injection moulded in the UK from pellets that have been reclaimed from recycled lanyards. Some of those lanyards were themselves made from rPET material derived from plastic bottles, others were made from virgin polyester.

The back of the keyring has the description “MADE IN THE UK FROM RECYCLED LANYARDS” incorporated into the moulding.

Available plain stock or customised with a full colour printed decal.

Decals are ideal for vibrant designs and are enhanced and protected by a glossy and hard-wearing domed epoxy coating.

Fitted with a jump ring and split ring (as these are recovered and reused from returned keyrings and other products they may slightly differ from those shown in the images).

High-quality keyrings are long-lasting and popular products people always keep close at hand. They make a great retail product and an effective promotional tool when used as a gift or giveaway item.

Product Specification

Minimum order quantity: 50

Dimensions: 53mm x 30mmx 3mm

Product weight (each): 10g

Fitting: jump ring and split ring

Material: recycled PET

Colours available: black

Print & Delivery
