Please Note:

These express products are personalised using dye sublimation to the flat (and unstretched) surface of the white sock material. Due to the elasticity of the socks, when worn the sock will stretch around the foot/ankle and the white base material of the sock may appear to slightly 'lighten' the colour of the sock (this particularly applies to dark colours). This is unavoidable and is a limitation of the production process of this express product. If you would like to see images that illustrate this issue, please let us know before proceeding, as any complaints received after the goods are made will be rejected.
