

# Basswood Information Sheet

Basswood (aka Tilia/Lindens/Lime) is a biobased, biodegradable alternative to fossil-fuel based materials (such as the most common forms of plastic). Due to a broad range of benefits, Basswood is widely recognised as a more environmentally conscious alternative to your standard plastic and wooden options.

## Eco Credentials

- Basswood is **recyclable, biodegradable and renewable** (absorbing carbon dioxide from the atmosphere and replacing it with oxygen).
- Basswood from **sustainably managed forests** is **grown faster than it is consumed**.\*
- Basswood is grown **without the need for synthetic fertilisers** (**improving soil quality** as it grows).
- Basswood is believed to be **hypoallergenic**.
- Most Basswood products are **suitable for dying with natural/vegetable-based dyes**.

*\* Our Basswood is **FSC certified** against the following standard:  
FSC-STD-40-004 V2-1 Standard for COC Certification.*
